## Exceptional from Design to User Experience

Founded in 2005, Savant was first to fully embrace mobile technology in home automation. Savant control systems offer an unparalleled user experience of controlling A/V Entertainment Distribution, Lighting, Climate, Shading, and Security from a single intuitive app or user interface. The inventive, easy-to-use and future-friendly products create a unique user experience that customers will enjoy for years and beyond.

Savant has become the Automation brand of choice for the world's most luxurious homes, castles, and even yachts. Please visit the Savant website for more information about the company and innovative products at: [www.savant.com](http://www.savant.com)

## Delight Your Customer with Elegant Options

## User Interfaces

A wide variety of handheld and in-wall user interface options, and iOS or Android Apps are available. All UI options provide the end user with the ability to personalize the interface to suit the unique needs with their life-style.

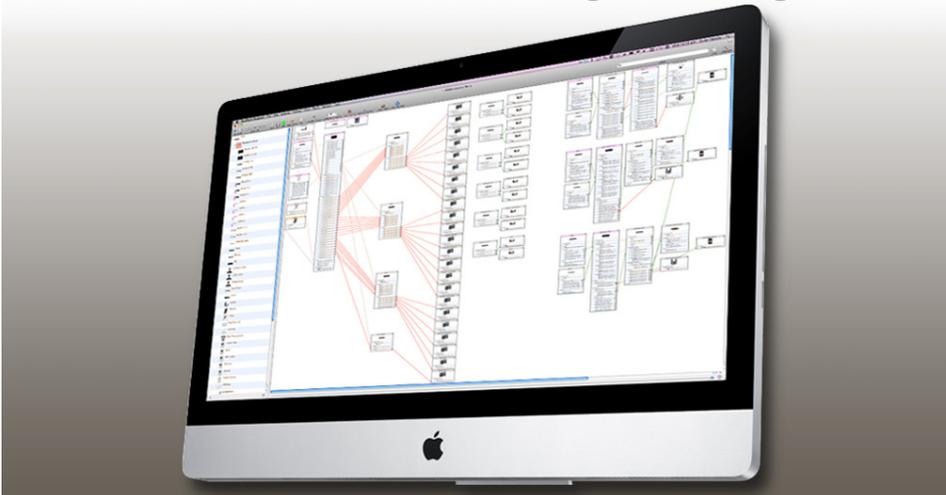

## Personalization

The revolutionary Savant app provides incredibly adaptability by the end user, allowing: User and guest profiles, personalized images of each room and the home, custom scenes, favorite channels, presets, control of several properties, etc...

## Enjoy Creating Your Personal User Interface

## Relax with a Streamlined Programming Process

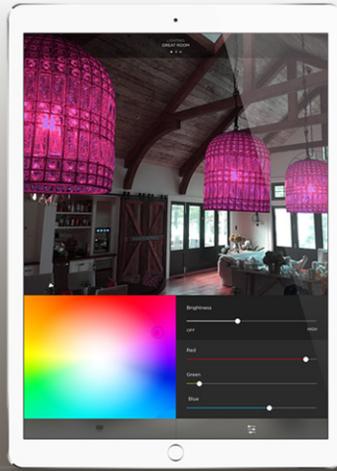

## Configurability

Savant was a truly pioneered the auto-build configuration of the system file, by simply defining the signal paths, then allowing the powerful software to "build the system file". Savant Blueprint software revolutionized the way programming should be done. Multiple user interfaces can be configured, firmware updated, and deployed at once. New remotes or app devices can be added with no new programming required.

## Innovative Technology

Savant began by developing powerful, innovative technology for a flagship automation system to manage the most complex & sophisticated, automation projects – then made the same powerful technology available for single room solutions. This innovation continues with True Image, Shading, HVAC Control, AVB, Artison Speakers, and much more innovation ... continuing to be developed every day ...

## Impress with Cool Innovation

## Have Confidence in Updates to New Technology

## Upgradeability

The sky is the limit. The Savant architecture provides great flexibility, through software updates, to embrace new technology, like: Voice Control, Energy Management, Lighting, Shading, AVB Distribution, etc... ..

## Scalability

The Savant Ecosystem is ever expanding and so can the system for the End-user, making it easy to add additional properties, lighting, shading, climate control, etc.. anytime by any Savant Certified, CE Professional...
